Open Positions for a Clinical Project Manager and Project Coordinator at the U.S. Military HIV Research Program

The U.S. Military HIV Research Program (MHRP) is looking for a Clinical Project Manager to help monitor and manage clinical research activities for international studies in our Bethesda, MD offices.

This position will require developing project plans and supporting budget development activities, working on grants and contracts, tracking progress of assigned clinical studies, organizing communication with study teams located in the U.S. and internationally and integrating administrative activities supporting clinical research projects. MHRP sites are located in Thailand and Africa and travel will be required.

This position offers a great opportunity to gain hands on experience with Clinical Project Management in a global health setting. MHRP is one of the leading clinical research programs developing a vaccine to prevent HIV, improving treatments of HIV and other co-infections, and also working towards a cure.

Further details regarding the **Project Manager position (Job ID 210835)** can be found at the following link:

We also have an open **Project Coordinator position (Job ID: 211066)** and further details can be found at the following link:
